Skills Translation Matrix

Prior operations experience mapped to GRC and RMF portfolio proof

Prepared by Mallory Davis

Use of this matrix: This document does not claim that wellness sales operations was cybersecurity work. It shows how specific work habits and analytical strengths support the GRC and RMF responsibilities demonstrated elsewhere in the portfolio.

1. Capability translation Back to TOC

Prior experience	GRC / RMF relevance	Portfolio proof	Hiring signal
SOP creation and process ownership	Control documentation and implementation reasoning	TRACER SSP; Internal Audit Case Study	Can turn expectations into reviewable operating statements.
CRM maintenance and data quality checks	Evidence reliability and traceability	Internal Audit Case Study evidence sufficiency review	Understands that records must be complete enough to support a conclusion.
Tracking unresolved service or process issues	Risk register and remediation tracking	Risk Assessment Report; POA&M	Can distinguish issue identification from closure management.
Cross-team follow-up with managers and operators	Control owner coordination	Security Controls Assessment; POA&M	Can work across roles without losing ownership clarity.
Escalating recurring operational problems	Management decision support	Audit executive summary; Risk treatment logic	Can frame why an issue matters and what decision is needed.
Creating reports for leadership	Risk communication and status reporting	Portfolio Index; Audit Case Study; POA&M	Can summarize detailed work without burying the point.

2. Where the portfolio provides direct proof Back to TOC

Role expectation	Direct portfolio evidence
Document system context and control implementation	TRACER System Security Plan Case Study
Assess controls using evidence and defined methods	TRACER Security Controls Assessment Case Study
Translate control gaps into risk scenarios	TRACER Risk Assessment Report Case Study
Track remediation with owners and closure standards	TRACER POA&M and Remediation Tracker
Write audit findings and leadership decision points	Cyber Control Readiness Internal Audit Case Study

3. Claims this matrix intentionally does not make Back to TOC

- It does not claim prior professional cybersecurity employment.
- It does not claim real agency authorization work or signature authority.
- It does not treat related operations strengths as identical to cyber control execution.
- It uses the portfolio artifacts as the proof of applied technical growth.
